

Lab 01

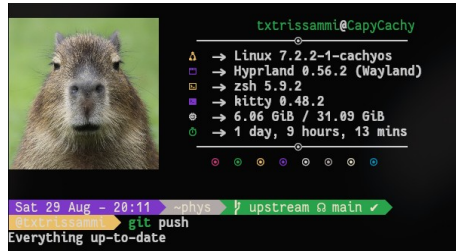

Goal

Install Git, setup a GitHub account and get added to OCU GitHub

Starting next lab, you'll build a small Java project called “TaskTracker” that carries through the rest of the semester — every lab from here on adds to it, so get comfortable with your setup now.

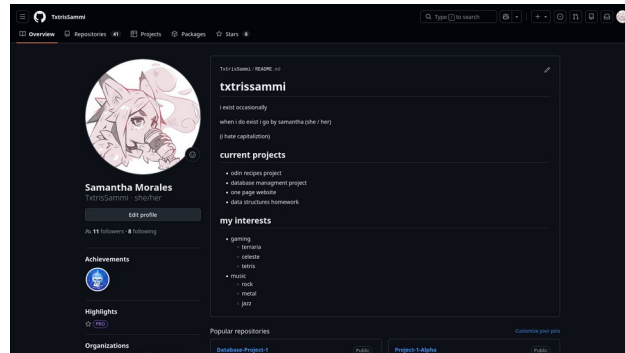

Download Git

- Go to <https://git-scm.com/downloads>
- Download git and install
- Run Bash Shell
- Take a Screenshot

Setup GitHub

- Go to <https://www.github.com>
- Create a GitHub Account
- Take a Screenshot of your profile page

Setup Education Student Offer

- Go to <https://education.github.com/pack#offers>
- Signup for Student Education offer

Get added to OCU GitHub

- Email your username to the Professor before the assignment is due so they can add you to the OCU GitHub <https://www.github.com/oklahoma-city-university>
- Take a screenshot of the OCU GitHub

Submitting your solution

- Upload a PDF with screenshots of each step above
- Use the following Naming convention: Lab01_[Last Name].pdf

Example: Lab01_Maxwell.pdf
